This transmittal is in response to a phone conversation with Ms. Cheryl McLewd in Publications related to the above-identified patent application, and more particularly, to the Notice of Drawing Inconsistency With Specification (copy enclosed) having a mailing date of June 27, 2001. The inconsistency noted in the transmittal from the U.S. Patent and Trademark Office indicated that Fig. 15 had not been provided. However, formal drawings of all figures, including Fig. 15, were provided to the U.S. Patent and Trademark Office on December 11, 2000. A copy of the cover sheet for this earlier transmittal is provided herein. However, to expedite the issuance of the present application, duplicate copies of Fig. 15 are provided herein. Note that there are two copies of Fig. 15 provided. One copy has corrections shown in red and the other is the black-inked formal drawing. Both of these drawings were submitted previously.

Please enter these duplicate copies of Fig. 15 in the above-identified patent application.

In response to the "Notice of Allowability" accompanying the "Notice of Allowance and Issue Fee Due" mailed September 19, 2000, regarding the above-identified patent application, enclosed for filing with said application are 22 sheets of formal, inked drawings illustrating Figs. 1, 2, 3, 4, 5, 6(1), 6(2), 6(3), 7, 8(1), 8(2), 8(3), 8(4), 9A, 9B, 10, 11(1), 11(2), 12, 13, 14, and 15 of the application. Figs. 1-15 constitute all of the drawings in the application. For Figs. 5, 6, 8, 11(1), 14 and 15 both a copy with corrections (in red), and a formal copy are provided. The corrections expand some abbreviations originally used into full words, add labels, correct spelling errors, in one case (Fig. 6(2)) adds additional text thereto, and in another case (Fig. 8(3)) corrects an inadvertently omitted arrowhead. Note in a conversation with the Examiner on December 7, 2000, the Examiner indicated that the new text for Fig. 6(2) would be permissible since this text is present in PCT patent application No. PCT/US97/15892, filed September 8, 1997, and the present application is a continuation-in-part of both this PCT application and the corresponding U.S. National Phase Filing

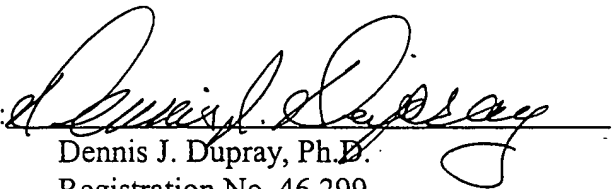

thereof (i.e., U.S. Patent Serial No. 09/194,367). Moreover, the omitted arrowhead of Fig. 8(3) is also shown in the above-referenced PCT application. Both the new text of Fig. 6(2) and the arrowhead of Fig. 8(3) were inadvertently omitted when the font size in these figures was increased from that of the originally filed PCT drawings. A copy of both Figs. 6 and 8 of the above-identified PCT patent application is also enclosed herewith with the text and arrowhead requested to be entered circled in red.

It is also requested that Fig. 5 be the figure that is provided on the front page of the corresponding U.S. Patent to issue from the present application.

Although no fee is believed due, if any fee is deemed due in connection with this submission, please contact the undersigned.

Respectfully submitted,
